

Press release

1st of March 2023

Our City.

That is the place where we all live together. 133,000 people from an amazing 167 countries are now residents and they are joined each year by 3,000 newcomers.

So we, the people, are the city. All together we make it, we live it. Each of us wants life and togetherness in our city to be at its best.

This is also the goal and commitment of the 27 candidates of the CSV for the election of the new city council on 11th June 2023.

For these elections, we have selected 12 women and 15 men at our General Assembly on 1st March 2023, who represent the diversity of our city as committed residents: our 27 candidates represent 7 different nationalities and are on average 45.8 years old.

As CSV we want to come out stronger of the municipal elections this coming June. As a team, we want to lead our city for the next years, with Serge Wilmes, our top candidate, as the next mayor.

Together we want to use the full potential of our city, to make it the place with the best quality of life for our fellow citizens:

Our city. The best place to live!

That is our vision, ambition and commitment for our city. We want Luxembourg-City to be open, modern and multicultural, where every aspect of our lives will be dealt with in the best possible way.

We want neighbourhoods to be vibrant, mixed and interconnected and to offer everything we need in everyday life. Our city must be an attractive, green and safe public space. We will prioritize the expansion of the bus and tram network, with less transit and safe ways to walk and cycle. We will strive for new, sustainable neighborhoods that offer affordable housing of the highest quality while preserving resources and making the best use of the land. We will aim to have modern, innovative and inclusive schools and child care facilities, with inviting schoolyards and playgrounds. Our children should have the best conditions for their well-being and development.

We endeavour to provide even more social support for people in need as well as the possibility to implement new ideas and a business-friendly environment.

Our aim is to have a high-performance and digitalised administration that is at the service of its residents and that grants direct participation to our fellow citizens interested in making Luxembourg-City the best place to live!
